

Annual Report (Oct 2017 - Oct 2018)

Food Self Reliance and Livelihood Resilience through agriculture practice, integrated livelihood initiatives and Natural Resource Management by formation of Farmers' Club and capacitating them in 9 partner Dioceses

Project No. IND/72769

Social Initiative for Growth and Networking (SIGN), Ranchi

Introduction

The project is an offshoot of the first phase intervention on capacitating and training farmers across Jharkhand. Most of the trained farmers influenced the other farmers in the villages. Qualitative improvement was noticed in cultivation practices and the net production was also on the increase be it rice, or maize, or vegetables and other agro activities. Many of the farmers also took up to cattle rearing and tree plantation. However, they were not in clubs, or groups to share the knowledge and work together to achieve more than what they got as individuals. Thus was born the concept of farmers' clubs. SIGN, Ranchi visited 18 Agricultural Technical Management Agencies (ATMA) to share ideas on the concept of farmer's club. All the district program directors of ATMA saw eye to eye with the concept and vouched support in the process of implementation and availing government benefits. Within this background, the State level orientation was organized for the partner directors and the staffs on the concept of the project as well as on the art of networking.

Training conducted at state level

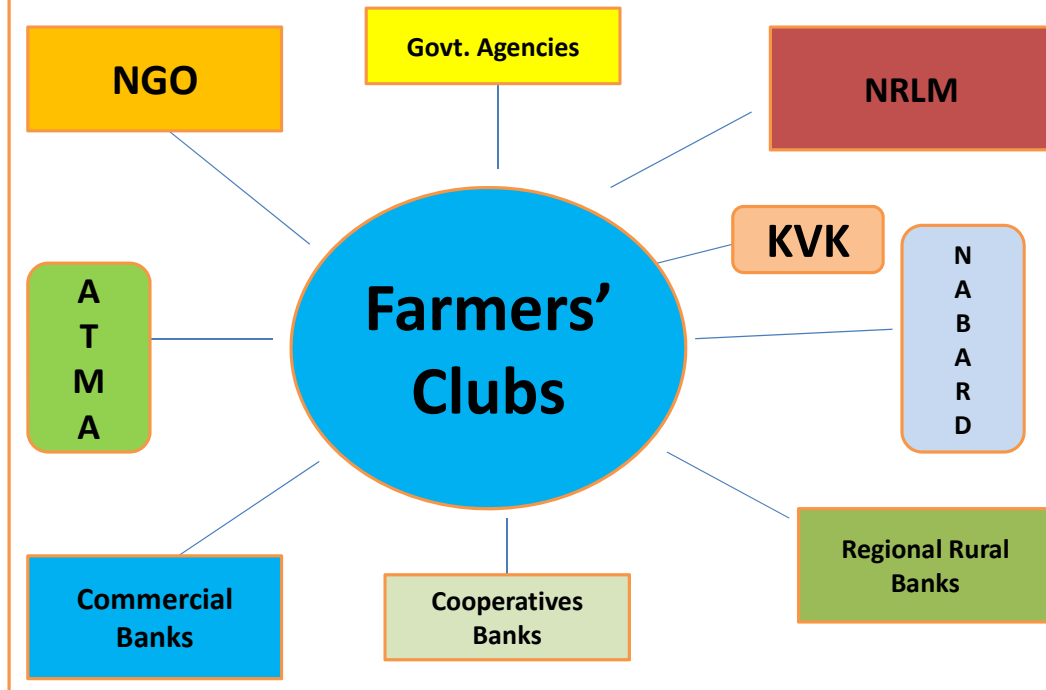

SIGN, Ranchi organized a state level capacity building cum orientation to the project staff of 9 partners on 13th - 15th November 2017 at SIGN, Ranchi conference hall. There were 12 participants including 2 regional coordinators participating in the same. The purpose of the training cum orientation was to make the coordinators to have a clear understanding of the farmers' club and its potentials in operating with government agencies. A PowerPoint presentation on the matter opened the house towards an involved discussion and reflection. Themes of three days training were as follows.

Objectives of Farmers' Clubs

- Knowledge sharing and a learning platform
- Reflecting together on possibilities and innovations in cultivation and other agricultural activities
- Risk management and support system generation
- Educating and inspiring those farmers who are ignorant and rigidly conventional
- Re-focussing on organic production and protecting local crops and seeds
- Linkage with Government institutions/departments to have access to technical know how and agriculture modernization as well as getting government benefits
- Uplift the socio- economic condition of the farmers
- Wasteland Management and runaway water harvesting
- Tree Planatation and horticulture
- Livelihood explorations and animal husbandary
- Motivated farmers become the voice of the Gram Sabha

Who can form farmers' Clubs

Any organization or agency can set goal and objectives of the programme to form farmers's club for strengthening and enhancing members of the farmers' club about new technology of agriculture farming. The SIGN Ranchi has set a broad functioning of farmers club as follows:

Broad Functions of Farmers' Club

- To organize Meeting
- Update technical know how for agriculture
- Enroll the farmers in the club
- Maintaining club accounts, draw up annual calendar of various agriculture events
- Coordinate with Banks to ensure credit flow among its members and forge better bank borrower relationship
- Liaison with corporate input supplier
- Undertake community works, education, health, environment and natural resource management
- Market rural produce and products

Structure, roles and responsibilities of group leaders

- Every club would have three office bearers elected by the club members on a democratic basis
- Office bearers should be progressive farmers not belonging to any political party
- Should be residents of the area
- No NGO representative can be an office bearer

- The office bearers would be convening meetings
- Arranging meeting with experts
- Books of accounts are maintained on regular basis
- Coordinate with bank and the line Departments of the state Government
- Above all to take along all the Club Members
- Support the conventioanl and ignorant farmers
- Become the voice in Gram Sabha Meetings

The prime duty of each group is to elect three office bearers who would be initially progressive farmers and not belonging to any political party. Office bearers have to become more wise and active to lead and capacitate in every aspect of area.

Design features of Farmers' Clubs

- Self-selection
- Focus on men & women
- Savings first and credit later
- Group finance only after 6 months
- Shorter repayment terms
- Developing a relationship with Banks

Understanding of Traditional Agriculture Benefits

- Eco-friendly agriculture practice
- Agriculture create habitants work in harmony with nature
- Agriculture boosts soil fertility
- Agriculture retains soil and prevents erosion
- Agriculture has a role in the water cycle
- Agriculture conserves water
- Agriculture providse food from limited sources
- Sustainability or existence of environment

Traditional agriculture has many more eco-friendly agriculture practices and those have to be maintained and to be applied for better outcome in agriculture farming.

Understanding of modern Agriculture benefits

- Increase in seed quality
- Meeting a growing demand for food by the world 's population
- Hunger was slightly reduced
- New technology
- New crop varieties are inintroduced
- Emphasis is on comparatively more production with same quantity of seed and same size of land.
- Double cropping

The more we use new technology, improved seed varities and methods in agriculture products we get more production but on the other hand it damages the natural soil fertility Therefore, farmers should stop blind use of fertilizer and should take up integrated pest management to define modern agriculture benefits.

Challenges in agriculture practices in present scenario

- Lack of will power of government in agriculture
- Fragmented land holding
- Lack of water for Irrigation
- Reaching of uncertified seed in the hand of farmers
- Over dependence on traditional crops like rice and wheat
- Irregular rain due to Climate change

Fr. S.Christu Das, the director of SIGN, Ranchi emphasized more on the objectives, functions, roles and responsibilities of farmers' clubs and indicated the bright future of farmers from their agriculture activities.

Fr. S.Christu Das and Mr. Anirudh Prasad shared their knowledge from the perspective of social capital sustainability. Most of the time, many activities are carried out in supporting the cause of the poor but hardly any social capital is generated towards sustainable living. They elaborated 6 types of capitals: Natural capital, cultural capital, financial capital, physical capital, human capital and social capital. They said that social capital captures the idea that social bonds and social norms are important basis for sustainable livelihoods. The greatest challenges are market economy, consumerism and the collapse of traditional management. Each diocese came up with three months action plan. SIGN generated a simple reporting format for project coordinators.

1st Review Meeting

The first quarterly review meeting of the project was held on 29th January 2018 at SDC Ranchi and on the same occasion a Network meeting too was held.

The review meeting was held in the from 9.00 a.m. to 11.00 a.m. and then from 3.00 to 5.00 p.m. while the networking meeting was held from 11.15 a.m. to 3 p.m. with a lunch break for half an hour.

The coordinators presented the initial accomplishments of the project. The common features that emerged out of the review were that the coordinators managed to come in touch with most of the farmers who took training in KVK as well as at the partners level. They also contacted the important stakeholders in the partner areas and villages where the formation of the farmers clubs would be feasible. They also connected with the farmers' friends and other government functionaries related to agriculture. They also listed the number of clubs formed in the initial first three months. However, they expressed their concern about the vastness of the area and connecting with all the farmers was consuming lot of time for just one coordinator.

The Director of SIGN suggested to them to make a map of the diocese and intensify the work in the areas where the response is better and travel may not consume all the time.

The meeting ended with a planning for the next quarter and suggestions to have a systematic way of approaching the intervention.

2nd Review Meeting

The 2nd quarterly review meeting was held on 27 April 2018 at SDC Ranchi. There were 19 participants for the meeting. The meeting was presided by the Director SIGN Fr. S. Christu Das and facilitated by Mr. Walter Z. Kerketta the regional coordinator.

Sharing diocese wise progress: The session started with PowerPoint presentation by the partner diocese. The presentation gave the picture of progress of the project at field level. The details of farmers club and the members are as follows in that period of time:

S.N.	Diocese	Number of Farmers club	Members in Farmers' Club		Total
			Male	Female	
1.	Daltonganj	70	628	13	641
2.	Dumka	40	325	105	430
3.	Gumla	71	1250	35	1285
4.	Hazaribag	30	281	245	526
5.	Jamshedpur	77	905	73	978
6.	Khunti	23	264	15	279
7.	Ranchi	62	879	30	909
8.	Simdega	40	503	0	503
9.	Bhagalpur	66	1058	24	1082
	TOTAL	479	6093	540	6633

Challenges:

- People's unavailability
- Minor forest product season
- Difficult to cover alone as area is geographically vast
- Difficult to contact farmers because of no network coverage
- There were quarry, comments and the suggestions on presentation by the floor.

Directors sharing on progress and the institutional involvement:

The Directors also felt that the area is vast and therewith it was almost impossible for one person to cover all the areas. They said that the coordinators are trying their best and yet the coverage is not easy. They also visit some of the villages and have regular meetings with the staff to evaluate and plan the intervention on a monthly basis. They said that rapport building with authorities of government departments is given priority as

it is very important to connect the clubs with the government schemes and benefits. Fr. Regimon said that lot has been done in last 6 months. Villages are identified to form farmers clubs. The formation started with mobilizing identified community. Number may not be big but many Farmers clubs are formed. The Director of SIGN summed up the discussion as follows:

1. Connect with all the capacitated farmers and make them the leaders of the groups. Get their help to form clubs.
2. Engage the other project staffs too to begin the reflection on farmers clubs in their own project areas. The critical issue

though is the fact that some of the dioceses do not have any projects at all.

3. Discuss the matter with Priests and Sisters in the parishes seeking their help in implementing the project.

4. Restrict the area to 'responding area' and intensify the work in such places instead of covering the entire diocese.

The meeting came to an end as all the Directors and Coordinators accepted to give a trial following the above proposed suggestions.

3rd Review Meeting

The 3rd quarterly review meeting was held on 24th July 2018 at SDC Ranchi. There were 25 participants for the meeting. The meeting was presided by Fr. S. Christu Das the Director, SIGN and facilitated by Mr. Walter Z. Kerketta the regional coordinator.

Sharing diocese wise progress: The session started with PowerPoint presentation by the partner diocese. The presentation gave the picture of progress of the project at field level. The details of farmers club and the members are as follows:

Outcomes	Partner Dioceses									
	Bhagalpur	Dumka	Daltonganj	Gumla	Hazaribag	Jamshedpur	Khunti	Ranchi	Simdega	TOTAL
Numbers of Farmers Club	81	54	80	77	47	122	35	55	30	581
Numbers of members	928	702	1082	1334	546	1444	412	817	404	7669
Training farmers club office bearers	109	86	124	103	120	114	91	104	67	918

After the formation of farmers club, training for its office bearers was held in each diocese. 918 farmers participated in the trainings. The content of the training was

Challenges:

Most of the challenges again centred around the area of coverage and the single person coverage.

Lack of enthusiasm among the farmers to be in groups.

The problems in Khunti area and the general situation across Jharkhand.

The meeting concluded with the suggestion to be cautious in sensitive areas and concentrate in other areas where situation is normal.

Networking Initiative

The partner Directors, the program coordinators and NGOs across Jharkhand supported by Manos Unidas participated in the networking initiative towards the formation of farmers' clubs which was held on 29th January 2018 at SDC Ranchi from 11.15 a.m. to 3.00 p.m. The 37 participants reflected on the importance of organizing farmers' into clubs. Fr. S. Christu Das, Director, SIGN Ranchi animated the reflection. The result of the reflection was that a serious engagement is the call of the day, as farmers need a platform for cross learning, to play leadership roles in the field of agriculture, to remain connected with the schemes available with the government etc. The meeting ended with a happy note to take forward the plan of forming as many farmers' clubs as possible in the area of operation.

The forth quarter meeting was held on the 25th October after the Farmers' convention. An evaluation was held on the performance of the partners. In spite of the difficulties, Daltonganj, Jamshedpur, Ranchi have performed well while Gumla is close to the target. The rest of the partners have been asked to look into the matter and find solutions to the issues in order to intensify the intervention. All of them agreed to work hard in the coming project year beginning from November 2018.

The Director of SIGN, one again, briefed the importance of Farmers' clubs in improving agriculture as these clubs become platforms for cross learning and connecting with the government which has many schemes.

Annual Farmers' Meet 25th October 2018

SIGN organized the State level Farmers Meet on 25th October 2018. 150 Farmers, 9 coordinators, 9 Directors, the Regional Coordinators and NGO partners participated in the Meet. Thus 180 were present in the Meet.

The Chief Guest of the day was Mr. Dr. Parvinder Kaushal the vice Chancellor of the Birsa Agricultural University (BAU), Ranchi. Most Rev. Felix Toppo S.J., the Archbishop of Ranchi and Most Julius Marandi, the bishop of Dumka were the special invitees. The program began sharp at 10.00 a.m. and was concluded at 3.00 p.m. with a lunch break just for 40 minutes. Activist Mr. Gladson Dungdung, Sr. Sajita, director of KVK, Holy cross, Hazaribag, Dr. Prashant Kumar Verma scientist Horticulture KVK, Holy cross, Hazaribag, were also present as guests as well as external resource persons.

The program started with lighting the Indian lamp and a short prayer. The Director of SIGN Fr. S. Christu Das accorded a warm welcome to all the guests and participants in the program. He gave a short brief on the project intervention.

Then Dr. Parvinder Kaushal, chief guest of the day, basically gave his point of view on integrated farming system, cultivation of all seasonal crops like the *Kharif* crops and said that farmers should go for '*Kharif*' and the '*Rabi*' crops both, rather than depending upon only one seasonal crop like *Kharif* crops. He emphasized that farmer should enhance their knowledge and the skills to double their income. The type of the land limits the income of farmers. This is difficult to survive with one cultivation. He shared the wide scope of self-employment in agriculture, viz. piggery, fishery horticulture etc. he appreciated the work undertaken by SIGN for farmers of Jharkhand. He suggested farmers and everyone to

join hand with SIGN. Most Rev. Archbishop Felix Toppo (S.J.) addressed the meeting and shared his view with farmers about enhancement of the skills, knowledge and importance of modern techniques in agriculture activities. He said that in today's scenario there is a need to integrate modern techniques with traditional agricultural practices, by which the quality and fertility of land would sustain for future and would be conserved for our coming generations. That

will ensure the improvement in financial, social, cultural, and spiritual development of the communities and in our villages and in the society all could live in peace, in unity, helping each other and thus establishing a good

environment in the society. Most Rev Julius Marandi, the bishop of Dumka also appreciated the work of the SIGN and the farmers and shared his thought among the farmers. He said, for best agricultural activities there should be a good coordination among farmers in the villages as well as with government. He also said that due to middle men, farmers are not getting the right price for their products. Thus farmers club is a very good idea for networking and exercising control over the market.

After the inaugural session, the Regional Coordinator of SIGN, Mr. Walter Z. Kerketta, gave a brief presentation about the work and the activities of the SIGN i.e. training given to the farmers in the first phase on improved agriculture and the farmers club formation in second phase i.e. since November 2017 to October 2018. Soon after the presentation, there were 2 rounds of panel discussion with 8 farmers on the dais in which they shared how the program and the adoption of improved agriculture have brought change in their life.

First round of the panel session was moderated by Fr. Regi, partner director SVS Chandwa. The farmers acknowledged the role of the program and the role of SIGN to organize in organizing the trainings and capacitating them in improved agricultural practices. Every farmer acknowledged that the training helped them to better cultivation. Today they are able to meet the daily needs of their families, educate their children and help other farmers. Mr. Saibu Oraon a progressive farmer from Latehar district shared that

increase in agricultural production has changed his life and inspired many other farmers. He said that piggery has become ATM for him after the training at Holy Cross KVK Hazaribag. The sharing inspired other farmers present in farmers' meet. Mrs. Anita Xalxo, from village Sidraul, block Burmu, district Ranchi also shared her experience. She is a private teacher but had training in 2016, from KVK, Holy cross, Hazaribag, organized by the SIGN, Ranchi. She, having inspired by the training was very much excited in piggery, so she started piggery farming. She told that first of all, after the training she constructed the piggery and bought 3 pigs for farming and today she has 24 pigs with her. She is also member of a farmers club. Today she could inspired by her; some other women of the same village and they started piggery farming. She told that due to lack of time, she is not fully engaged in piggery farming, but other women are doing better than her. 6 others also shared in the same line expressing their experience in farming that has changed their life. Mr. Gladson Dungdung, activist, summed up the panel session and shared his view with farmers and the audience. He said that today we have lots of negative thoughts regarding agriculture as an occupation. First of all, we must have to remove such type of negative thoughts within us, and only then we can change our fate and bring about quality change in our life. Agriculture gives financial freedom and it plays a vital role in making food security for the nation as well as for the whole world. On the other hand, government as well as the farmers should give first priority farming and improved agricultural practices. Today the farmers are facing lots of challenges and problems, like land security, use of pest and chemical

compost fertilizer, irrigation, monsoon, etc. Deforestation is one of the major reasons for climate change and thus the failed monsoons. Thus, a lot more has to be done to change the existing situation.

In the second half of the day after lunch an input session was taken up by external resource person from KVK, Dr. Prashant Kumar Verma scientist horticulture, Holy cross, Hazaribag,. He took session on – “Role of the farmers club in sustainable agriculture”. He started the session with the importance and value of the integrated

agricultural farming and gave an example of Israel which has demonstrated to the world that even in harsh situations agriculture is possible through drip irrigation and mulching. He shared his experiences and knowledge, like the importance of SRI technique for crops and vegetable cultivation. He also mentioned about the impact of the climate change in the world, which is disturbing agricultural interventions. He suggested to plant and cultivate all types of trees, plants and crops, like ancient time crops like Madwa (Raggi) and other nutritious foods,

herbal plants including ‘Drum stick’ (*Moringa Oleifera*) Munuga plants. He also put his brief focus on pulse crops, oil crops cultivations. He suggested the importance of kitchen garden that can add value to the plate of the daily diet. He also suggested with some techniques to cultivate some cash crops and flowers which are highly in demand in the market as per the occasion like rose flower, marigold that give high returns in terms of money. He also suggested taking benefits from the government schemes. He suggested to take-up animal husbandry for additional income. Then he said that market system can also be changed by the farmers club. Now, there is less marketing system but it can also be developed by farmers club. There are lots of options to earn money from agriculture; therefore many of the well literate and educated people are also getting attracted towards agricultural work. He also told that almost 40% of the agriculture land in Jharkhand is in plane area though it is marked with hills and mountainous range. The runaway water has to be managed to preserve moisture in the land as well as store water for irrigation. Dr. Prashant suggested that we need to make water to walk rather than run. He suggested to use fertilizer after proper soil test. If all the kisan club members do it in the same time, it will help to neutralize alkalinity and the acidity of the soil of the area. He said that trained farmers could also become a good trainer for others in village level, so they can also give their support to increase the number of trained farmers as well as in the development of agriculture work.

At the end there was panel of 3 members Dr. Prashant Verma, Sr. Sajeeta and Mr. Walter who cleared doubts of the audience. The meeting ended with vote of thanks to all the participants by the SIGN Director Fr. S. Christu Das and he drew an action plan for the Farmers club drawing the points from the speaker of the day Dr. Prashant Varma.

Future Action Plan

1. Integrated agriculture practice – Not just rice but vegetables, cereals, animal husbandry, horticulture, herbal plants
2. Processing and value addition to products
3. Monsoon Onion
4. Soil Health and maintenance of soil health card
5. Drip irrigation and mulching
6. Preservation of upper soil
7. Bundding and 5% modals for stopping the runaway water and generating moisture in the soil.

8. Helping the rain water to walk and not run away
9. Nutrition Garden
10. Farmers' Club

Details of Farmers' Club at the end of the first year of the project

Diocese	No. of Farmers' Clubs	Participants of Farmers' Clubs		Total Members

- They increased interest in Integrated agriculture activity

AGRICULTURE ACTIVITIES

Paddy cultivation through SRI method

Name of farmer	Agriculture activity	Land Decimal or Acre	Purpose
Mr. Hopna Marandi	Paddy cultivation (SRI)	12 Decimal	Sale and self consumption
Mr. Madan Murmu	Paddy cultivation (SRI)	10 Decima	Sale and self consumption
Mr. Masilal Besra	Paddy cultivation (SRI)	6 Decimal	Sale and self consumption
Mr. Sita Ram Murmu	Paddy cultivation (SRI)	13 Decimal	Sale and self consumption
Mr. Ruplal Soren	Paddy cultivation (SRI)	8 Decimal	Sale and self consumption
Mr. Ram Prasad Tudu	Paddy cultivation (SRI)	6 Decimal	Sale and self consumption
Mr. Sunil Hansda	Paddy cultivation (SRI)	5 Decimal	Sale and self consumption
Mr. Markus Tudu	Paddy cultivation (SRI)	7 Decimal	Sale and self consumption
Mr. Ruplal Soren	Paddy cultivation (SRI)	6 Decimal	Sale and self consumption
Mr. Thomas Hembrom	Paddy cultivation (SRI)	10 Decimal	Sale and self consumption
Mr. Kornelius Hembrom	Paddy cultivation (SRI)	5 Decimal	Sale and self consumption
Mr. Nathaniel Marandi	Paddy cultivation (SRI)	50 Decimal	Sale and self consumption
Mr. Jisu Marandi	Paddy cultivation (SRI)	4 Decimal	Sale and self consumption

Maize cultivation

Name of farmer	Agriculture activity	Land Decimal or Acre	Purpose
Mr. Jiyalal Murmu	Maize	45 Decimal	Sale and self consumption
Mrs. Madhuri Devi	Maize	24 Decimal	Sale and self consumption
Mr. Barnabas Soreng	Maize	10 Decimal	Sale and self consumption
Mr. Nathaneil Marandi	Maize	55 Decimal	Sale and self consumption
Mrs. Sunita Kumari	Maize	30 Decimal	Sale and self consumption
Mr. David Tudu	Maize	40 Decimal	Sale and self consumption
Mr. Sita Ram Murmu	Maize	50 Decimal	Sale and self consumption
Mr. Seetaram Murmu	Maize	15 Decimal	Sale and self consumption
Mr. Raj Soren	Maize	40 Decimal	Sale and self consumption

Mr.Carlus Kisku	Maize	2 Decimal	Sale and self consumption
Mr.Jiya Lal Murmu	Maize	40 Decimal	Sale and self consumption
Mrs.Sunita Marandi	Maize	35 Decimal	Sale and self consumption
Mr. Sushil Hembrom	Maize	10 Decimal	Sale and self consumption
Mr.Sebastian Kujur	Maize	30 Decimal	Sale and self consumption
Mrs. Kunti Kumari	Maize	20 Decimal	Sale and self consumption
Mr.Deonarayan Murnu	Maize	12 Decimal	Sale and self consumption
Mr. Luk P. Hembrom	Maize	15 Decimal	Sale and self consumption
Mr.Seeta Ram Murmu	Maize	5 Decimal	Sale and self consumption
Mr.Thomas Hembrom	Maize	11 Decimal	Sale and self consumption

Wheat cultivation

Name of farmer	Agriculture activity	Land Decimal or Acre	Purpose
Mr.Markus Tudu	Wheat	5 Decimal	Sale and self consumption
Mr. Sunil Hansda	Wheat	20 Decimal	Sale and self consumption
Mr.Manijar Murmu	Wheat	15 Decimal	Sale and self consumption
Mrs. Lalita Kumari	Wheat	22 Decimal	Sale and self consumption
Mr. Bansi Marandi	Wheat	5 Decimal	Sale and self consumption
Mr. Sushil Hembrom	Wheat	42 Decimal	Sale and self consumption
Mr. Sita Ram Murmu	Wheat	35 Decimal	Sale and self consumption
Mr. Khudiram Hansda	Wheat	17 Decimal	Sale and self consumption
Mrs. Madhuri Devi	Wheat	10 Decimal	Sale and self consumption
Mr. Barnabas Soreng	Wheat	10 Decimal	Sale and self consumption
Mr.Francis Kisku	Wheat	24 Decimal	Sale and self consumption
Mr. Sibu Kerketta	Wheat	60 Decimal	Sale and self consumption
Mr. David Tudu	Wheats	1 Acre	Sale and self consumption
Mr.Barnabas Soreng	Wheat	12 Decimal	Sale and self consumption
Mr.Jiya Lal Murmu	Wheat	5 Decimal	Sale and self consumption

Vegetables cultivation

Name of farmer	Agriculture activity	Land Decimal or Acre	Purpose
Mr.Jiyalal Murmu	String Beans	8 Decimal	Sale and self consumption
	Onion	6 Decimal	Sale and self consumption
	Bitter Gourd	5 Decimal	Sale and self consumption
	Garlic	4 Decimal	Sale and self consumption
Mrs. Sunita Kumari	Potato	28 Decimal	Sale and self consumption
	Cauliflower	12 Decimal	Sale and self consumption
	String Beans	5 Decimal	Sale and self consumption
	<i>Jhingi</i>	2 Decimal	Sale and self consumption
Mrs. Anuradha Devi	Lady Fingers	15Decimal	Sale and self consumption
	Tomato	10 Decimal	Sale and self consumption
	Cabbage	8 Decimal	Sale and self consumption
	String Beans	6 Decimal	Sale and self consumption
	Potato	8 Decimal	Sale and self consumption
	Bitter Gourd	4 Decimal	Sale and self consumption
	Brinjal	4 Decimal	Sale and self consumption
Mr. Sita Ram Murmu	Onion	10 Decimal	Sale and self consumption
	Tomato	10 Decimal	Sale and self consumption
	Potato	10 Decimal	Sale and self consumption
	Cauliflower	5 Decimal	Sale and self consumption
	Bitter Gourd	3 Decimal	Sale and self consumption
	French Beans	3 Decimal	Sale and self consumption
	String Beans	1 Decimal	Sale and self consumption
	<i>Jhingi</i>	1 Decimal	Sale and self consumption
	Lady Fingers	1 Decimal	Sale and self consumption
Mr.Francis Kisku	Potato	15 Decimal	Sale and self consumption
	Brinjal	15 Decimal	Sale and self consumption
	Garlic	2 Decimal	Sale and self consumption
Mrs. Lalita Kumari	Brinjal	8 Decimal	Sale and self consumption
	Lady Fingers	6 Decimal	Sale and self consumption
	Radish	2 Decimal	Sale and self consumption
	<i>Gongra</i>	1 Decimal	Sale and self consumption
Mr. Thomas Hembrom	Potato	21 Decimal	Sale and self consumption
	Cabbage	11 Decimal	Sale and self consumption
	Brinjal	6 Decimal	Sale and self consumption
	Onion	5 Decimal	Sale and self consumption
	Bottle Gourd	2 Decimal	Sale and self consumption
Mr. Shankar Mandal	Tomato	18 Decimal	Sale and self consumption
	Brinjal	15 Decimal	Sale and self consumption
	Lady Fingers	10 Decimal	Sale and self consumption
Mrs. Pinki Devi	Potato	15 Decimal	Sale and self consumption
	Brinjal	9 Decimal	Sale and self consumption
Mr. David Tudu	Onion	22 Decimal	Sale and self consumption
	Potato	9 Decimal	Sale and self consumption
	String Beans	6 Decimal	Sale and self consumption
	Cauliflower	5 Decimal	Sale and self consumption
	<i>Jhingi</i>	2 Decimal	Sale and self consumption
Mr. Barnabas Soreng	Potato	17 Decimal	Sale and self consumption
	Tomato	10 Decimal	Sale and self consumption
	Brinjal	6 Decimal	Sale and self consumption
	Cabbage	5 Decimal	Sale and self consumption

	Lady Finger	3 Decimal	Sale and self consumption
	Bottle Gourd	2 Decimal	Sale and self consumption
Mr.Sanoj Kisku	Brinjal	25 Decimal	Sale and self consumption
	Tomato	19 Decimal	Sale and self consumption
	Onion	17 Decimal	Sale and self consumption
	Bitter Gourd	4 Decimal	Sale and self consumption
Mr. Nathaniel Marandi	Potato	12 Decimal	Sale and self consumption
	Brinjal	10 Decimal	Sale and self consumption
	Onion	5 Decimal	Sale and self consumption
	Garlic	2 Decimal	Sale and self consumption
	String Beans	1 Decimal	Sale and self consumption
	Bitter Gourd	1 Decimal	Sale and self consumption
Mr.Manijar Murmu	Bottle Gourd	25 Decimal	Sale and self consumption
	Onion	10 Decimal	Sale and self consumption
	String Beans	4 Decimal	Sale and self consumption
	Bitter Gourd	2 Decimal	Sale and self consumption
Mrs. Ankita Kumari	Tomato	15 Decimal	Sale and self consumption
	Brinjal	9 Decimal	Sale and self consumption
	Bhaji	1 Decimal	Sale and self consumption
Mr.Thakur Hembrom	Cabbage	15 Decimal	Sale and self consumption
	Brinjal	11 Decimal	Sale and self consumption
	Onion	10 Decimal	Sale and self consumption
	Radish	4 Decimal	Sale and self consumption
Mrs. Madhuri Devi	Potato	12 Decimal	Sale and self consumption
	Brinjal	8 Decimal	Sale and self consumption
	Onion	6 Decimal	Sale and self consumption
	Garlic	2 Decimal	Sale and self consumption
Mrs. Laxhmi Kumari	Brinjal	10 Decimal	Sale and self consumption
	Lady Fingers	7 Decimal	Sale and self consumption
	Green Vegetable	2 Decimal	Sale and self consumption
Mr.Lackan Soreng	Tomato	16 Decimal	Sale and self consumption
	Lady Fingers	11 Decimal	Sale and self consumption
	Brinjal	9 Decimal	Sale and self consumption
Mr. Luk P. Hembrom	Cucumber	2 Decimal	Sale and self consumption
	String Beans	2 Decimal	Sale and self consumption
	Bottle Gourd	1 Decimal	Sale and self consumption
Mr.Sibu Kerketta	Cabbage	12 Decimal	Sale and self consumption
	Lady Fingers	11 Decimal	Sale and self consumption
	Brinjal	7 Decimal	Sale and self consumption
Mrs. Pratima Kumari	Brinjal	8 Decimal	Sale and self consumption
	Bottle Gourd	4 Decimal	Sale and self consumption
	Lady Fingers	2 Decimal	Sale and self consumption
	Bitter Gourd	2 Decimal	Sale and self consumption
Mrs. Kunti Kumari	Tomato	18 Decimal	Sale and self consumption
	Potato	16 Decimal	Sale and self consumption
	Brinjal	8 Decimal	Sale and self consumption
Mrs. Candni Kumari	Brinjal	10 Decimal	Sale and self consumption
	Lady Fingers	8 Decimal	Sale and self consumption
	Jhingi	3 Decimal	Sale and self consumption
	Broccoli	2 Decimal	Sale and self consumption

Cash Crop

Name of farmer	Agriculture activity	Land Decimal or Acre	Purpose
Mr. Devanand Paswan	Mustard oil	24 Decimal	Sale and self consumption
	Rai	8 Decimal	Sale and self consumption
	Chilli	2 Decimal	Sale and self consumption
Mr. Sukhraj Mandal	Teesi	22 Decimal	Sale and self consumption
Mrs. Madhuri Devi	Teesi	28 Decimal	Sale and self consumption

Stories of change

1. Sitaram Murum, age 38 and his wife Mrs. Kisku, age 30 with his 4 children live in village Matihani, panchayet Baragaha Hariyari, block Podayahat, district Godda of Jharkhand state. He participated in 5 days agriculture training programme in Holy Cross, KVK, Hazaribag and learnt new techniques of agriculture. Earlier he was only cultivating for family consumption. He cultivated in the traditional way and had hardly any knowledge about the modern pests leading to loss of crop. Therefore, he was not getting sufficient crops out of his hard labour. The family remained very poor and financially not at all sound. However, later on after the training he is now cultivating all the crops and vegetables by adopting scientific methods like selection of the high quality seeds available in the market as well as SRI methods using proper recommended distance of 2.5 to 3 ft. of the plants and seeds of the crops etc. He is also using cow dung in large volume but chemical fertilizers in proper ratio. By this effort today, crop production has improved 3 to 4 times more, thanks to the training. Now he is in a position to sell in the market the excess production after having stored for family consumption. He is able to send the children to the school and is becoming a modal for other villafe farmers.

Today his financial condition is improving very fast and by his own income, he has purchased the assets as mentioned below-

- o Motorcycle
- o Stitching machine
- o Irrigation machine
- o Educating his three children in private school

Hence, inspired by him other farmers of the same village also started agricultural activities and they are changing their life.

2. Mr. Kalistus Kisku age of 65 is a retired teacher comes from village & panchayat Kharkachya, block Poreyahat and district Godda. In this village two major communities (Santal tribal and Muslim) live together in a peaceful atmosphere. There are 35 Santal households out of 75 and total population of the village is 180. Earlier, in this village both men and women were not taking much interest in agricultural activities. There was a problem of open grazing in the village and therefore the interested farmers could not go for the second crop cultivation. However, in 2015 Mr Kalistus Kisku came in contact with Social

Service Society, Bhagalpur and participated in 5 days agricultural related training at Holy cross, KVK, Hazaribag, organized by the SIGN, Ranchi. He learned new techniques and scientific methods of agriculture and concept of integrated farming system in which he learned how to cultivate crops, vegetables, tree plantation and animal husbandry etc. Soon after the training, he was very much excited and motivated and inspired that he wanted to translate the learning into the field. He came back to the village and shared his knowledge and techniques of agriculture with the villagers. They were not very convinced. He began to cultivate in

his own field. The improved production convinced the villagers. Now he has formed Sidhu Kanhu Farmers club on 12th April, 2018, in which there are 19 members, consisting of 15 men and 4 women. There are 3 leaders as per the guidelines namely Mr. Abraham Soren, Mr. Bajal Soren and Mr. Mr. Kalistus Kisku himself as president, secretary, treasurer respectively. After the formation of the club, they made bylaws and organized regular monthly meetings where they discuss various issues related to agriculture and social life. All the members of the club feel good and now they are doing their *ravi* crops after *kharif* crops. Almost 50% open grazing is under control. Now villagers are cultivating pulses, potato, onion, mustarded oil and foot yam etc. The participation of the members in meetings as well as other activities of the club is very encouraging.

3. Village Dahupaghar, post office Nawdiha, panchayet Liladah, block Poreayhat, district Godda and in this village live 100 Santal families. The total population of the village is 500. Farmers club was formed on 15th July, 2018 in this village with a name Jharkhand Kisan Club. There are 15 members in the club and as per the rules of the club, there are three post holders namely Mr. Thakur Hembrom, Mr. Manual

Hembrom and Mr. Suraj Lal Soren as president, secretary and treasurer respectively. Member of the club conduct their regular monthly meeting as per their rules formed. In the month of September 2018 as per the *Swach Bharat* government schemes, toilet construction works came in the village. 10 members of the club constructed the toilets by themselves and motivated the other 5 to construct themselves too while 40 other toilets were constructed by agents as 55 toilets were sanctioned for the village. The farmers club has brought in a government scheme, executed the construction by themselves and the hope is that other villagers who do not have membership with the club too will get motivated in the coming years.

Fr. P.K. Jose
Director, BSSS

Mr. Thomas Hembrom
Coordinator, BSSS

Story of Change

1. Mr. Bijendar Oraon son of Basudeo Oraon lives in Bari village of Chandwa block in Latehar District. He is a small farmer having 3 acres of land (2.50 low lands, 50 Decimal Upland where he cultivates

vegetable). Earlier he was following traditional practices in cultivating crops as a result of which his yield was poor. He is interested in adapting new technology in farming therefore SVS had sent him for 5 days of training on modern agricultural practices at Holy Cross Krishi Vigyan Kendra (KVK) Hazaribagh. The

training was very intensive one and it was very much appreciated by all the farmers. He implemented treatment of seeds before sowing which improved production. Just a simple method made a change in the quality output.

This encouraged him to begin System of Rice Intensification (SRI) in Paddy cultivation in 6 decimal. He also cultivated 30 kg of Elephant Foot Yam and got a production of 200 kg. He could sell in the market and get an income. He cultivated tomato in 10 decimal of land, pea in 8 decimal of land, green vegetable (Palak), French beans and red vagee in few land. He could sell the production of all these vegetables in the local market from March, 2018 to May, 2018 and earned a handsome profit. The details of the earned profit are as following:-

Sl. No.	Crops/Vegetable	Quantity Sold (Kg)	Rate (Rs.)	Amount (Rs.)
1	Elephant foot yam	175	40	7,000
2	Tomato	150	15	2,250
3	Pea	150	15	2,250
4	Green vegetable			400
5	French bean			300
6	Red Vajee			200
Total				12,400

At present, he has cultivated Tomato in 10 decimal of land after 15 day. Tomato will be ready to be sold in the market.

Surajmukhi Kissan Club, Sons

SN	Particulars	Details/Information
1	Name	Surajmukhi Kissan Club
2	Starting	04.02.2018
3	Number of Members	15
4	Village	Sons, Sassan Panchayat
5	Block	Chandwa
6	Name of President	Kishore Oraon
7	Vice President/Secretary	Ravi Shankar Oraon
8	Treasurer	Shiv Shankar Oraon

The group meets every week on Sundays. The members have also made a set of byelaws for the running of the group. They have also started a fund for the group collecting a contribution from the members. With the money collected thus, they bought a large vessel and water container, which they now give on rent. The members also now help each other for ploughing the land during monsoon.

2. Harit Sanjeevani Kissan Club, Kita village

SN	Particulars	Details/Information
1	Name	Harit Sanjeevani Kissan Club
2	Starting	07.04.2018
3	Number of Members	16
4	Village	Kita, Sasan Panchayat
5	Block	Chandwa
6	Name of President	Satya Prakash Oraon
7	Vice President/Secretary	Surender Oraon
8	Treasurer	Manoj Oraon

The group meets every Saturday. They keep the minutes of the meeting. The group has also decided to collect a fund through voluntary contributions from the members. A separate register is kept for this purpose. They have decided to involve in vegetable cultivation depending on availability of irrigation facilities. The group has also made their own bylaws for the group functioning. The members who are absent without information also pay a fine of Rs.10/- to the common fund. During the khariff season, the members helped each other for ploughing the land. They also have planned to start a small shop in the village for sale of agricultural products and other grocery items. They also manage to get information about government schemes. They got registered themselves for the beejgram programme of KVK, Balumath and received 20 Kg each paddy seed of MTU1010 for all the 16 members.

Fr. Regimon
Director, SVS, Chandwa

Mr. Sunil Toppo
Coordinator, SVS, Chandwa

DUMKA DIOCESE

Farmers club office bearers training at diocese level

S.N	Date	Place	Subject	Participants			Resource Person
				M	F	Total	
1.	6th – 8th May 2018	SDC, Dumka	Integrated Scientific Method of Agriculture	28	22	50	Mr. Walter & Mr. Satyender Tuddu
2.	7th – 8th June 2018	SDC, Dumka	Integrated Scientific Method of Agriculture	24	12	36	Mr. Walter & Mr. Satyender Tuddu

Krishak Mitra Training conducted at Diocese level

S.N	Date	Place	Subject	Participants			Resource Person
				M	F	Total	
3.	27 th 28 th Aug. 2018	SDC, Dumka	Integrated Scientific Method of Agriculture	52	02	54	Walter Kerketta, Satyendra Tudu, Arjeeun Tigga & Edmund Kerketta

Contents:

- **Concept of Farmers club:** - Objective of farmers club, Importance of farmers club, Why farmers club?, Roll & Responsibilities of farmers club, Bylaws of farmers club, Roll & Responsibilities of farmers club, Roll & Responsibilities of Krishak Mitra
- **Vegetable cultivation (Potato, Onion, Tomato, Broccoli, French, Beans, Ginger and other green vegetables):-** Basic principal of scientific methods of cultivation, Soil treatment, Seed treatment, Nursery preparation, Root treatment, Field preparation, Methods of sowing, Control of weeds, Pest management by, organic and inorganic, Use of organic and inorganic fertilizer
- **Animal husbandry (Goatery, piggery, poultry, fishery, duck rearing):-** Different breeds, Selection of place, House management, Feed management, Common diseases remedies,
- **Foods crops cultivation (Paddy, maize, wheat, mustard oil, gram):-** SRI methods, Soil treatment, Seed treatment, Field preparation, Sowing methods, Control of weeds, Pest management, by organic and inorganic, Use of organic and inorganic fertilizer, Storage of productions
- **Tree plantation (Mango, lichi, guava, papaya and other timber trees):-** Importance of trees, Pit preparation, Caring of the plants, Proper use of water, Management of related diseases of the plant

Outcome of trainings:

- 140 farmers gained knowledge and new techniques of current agricultural farming system.

Agriculture Activities

Story of Change

Mr. Muna Hembrom S/O Mr. Lobin Hembrom comes from Kurumtanr village, Panchayat Nawadih, block Jama, district Dumka. Mr. Muna got an opportunity to attend training on agriculture at Ranchi in the year 2015. During these two days of training he changed his thinking of farming. After the training program, he applied integrated agricultural concept in his agriculture production. During the monsoon period, he cultivated paddy through SRI method in a small piece of land and earned double products compared to traditional method. He

has been applying the same method of techniques in paddy cultivation for the past three years. Now he has doubled his output and his income.

He is also using new techniques in tomato and French bean cultivation. Both these vegetables give him satisfactory production. He used to sell his vegetables in the local market. Now he takes and sells his vegetables at Dumka vegetable market yard with good profit. This year in the month of September 2018 he cultivated and sold French beans in the market with high rate and earned net profit of Rs. 8000.00. He and his family have focused on integrated farming concept in all the agricultural activities. At present, they have vegetables, paddy cultivation, tree plantation, kitchen garden, duck rearing and dairy farm. His family economic condition has improved. As a result, he is able to educate his children in a reputed school.

Fr. Sonatan Kisku
Director, SDC, Dumka

Stories of change

1. Deministar Minj, age 45 and his wife Esthor Minj, age 44 belong to village Barisiya Nakti Tola, panchayet Asni, district Gumla of Jharkhand state. He is a traditional farmer. Life had been always a struggle as he depended only on traditional cultivation and crop management. The production was very less and he was not in a position to manage the family needs.

Meanwhile he came in touch with Gram Uthan Kendra, Gumla and SIGN organization, Ranchi and he took part in the intensive scientific training organized at KVK, Hazaribagh.

Soon after the training, he changed the methods of crop cultivation and other agricultural activities. He started to cultivate vegetables and other crops within the framework of scientific methods and SRI methods. He also learnt the art of identifying pests affecting the crops and the use of right pesticides to control the pests. He also gained knowledge to cultivate seasonal vegetables as per the season and demand in the local market. He is able to make an income of averging Rs. 3- 4 lacs per annum. It has been a quantum jump. He also engages in animal husbandry and fishery. He has planted 170 trees in this year. He has 8-10 farmers working with him and thus he is becoming an inspirational farmer for many in the village. Hence, today Mr. Deministar Minj is very grateful to SIGN, Ranchi and Gram Uthan Kendra, Gumla, because of which his family financial condition is improving and he is able to guide other farmers in quality agricultural practices.

Mr. Elias Surin
Coordinator, Gumla

Fr. Cyprian Kerketta
Assistant Director

HAZARIBAG DIOCESE

Farmers club office bearers training at diocese level

S.N	Date	Place	Subject	Participants			Resource Person
				M	F	Total	
1.	15th – 17th April	Hazaribag	Integrated scientific method of agriculture	46	2	48	Mr. Satendra Tudu, Mr. Walter Kerketta & Ajit Tirkey

S.N	Date	Place	Subject	Participants			Resource Person
				M	F	Total	
2.	12th – 13th June 2018	Hazaribag	Integrated scientific method of agriculture	45	15	60	Walter Kerketta & Ajit Tirkey

Krishak Mitra Training conducted at Diocese level

S.N	Date	Place	Subject	Participants			Resource Person
				M	F	Total	
3.	7 th - 8 th September, 2018	Jan Vikas Kendra, Hazarbag	Integrated scientific method of agriculture	25	5	30	Walter Kerketta, Arjeeun Tigga & Ajit Tirkey

Contents:

- **Concept of Farmers club:** - Objective of farmers club, Importance of farmers club, Why farmers club?, Roll & Responsibilities of farmers club, Bylaws of farmers club, Roll & Responsibilities of farmers club, Roll & Responsibilities of Krishak Mitra
- **Vegetable cultivation (Potato, Onion, Tomato, Broccoli, French, Beans, Ginger and other green vegetables):-** Basic principal of scientific methods of cultivation, Soil treatment, Seed treatment, Nursery preparation, Root treatment, Field preparation, Methods of sowing, Control of weeds, Pest management by, organic and inorganic, Use of organic and inorganic fertilizer
- **Animal husbandry (Goatery, piggery, poultry, fishery, duck rearing):-** Different breeds, Selection of place, House management, Feed management, Common diseases remedies,
- **Foods crops cultivation (Paddy, maize, wheat, mustard oil, gram):-** SRI methods, Soil treatment, Seed treatment, Field preparation, Sowing methods, Control of weeds, Pest management, by organic and inorganic, Use of organic and inorganic fertilizer, Storage of productions
- **Tree plantation (Mango, lichi, guava, papaya and other timber trees):-** Importance of trees, Pit preparation, Caring of the plants, Proper use of water, Management of related diseases of the plant

Outcome of training:

- 138 farmers enhanced their knowledge on scientific methods of vegetables, horticulture and paddy cultivation
- They increased interest in agriculture activity

AGRICULTURE ACTIVITIES

Paddy cultivation through SRI method

Name of farmer	Agriculture activity	Land Decimal or Acre	Purpose
Mrs. Monika Horo	Paddy cultivation (SRI)	18 Decimal	Sale and self consumption
Mrs. Beronica Muhkal	Paddy cultivation(SRI)	6 Decimal	Sale and self consumption
Mr. Gendo Ganjhu	Paddy cultivation(SRI)	10 Decimal	Sale and self consumption
Mrs. Monika Tuti	Paddy cultivation(SRI)	12 Decimal	Sale and self consumption
Mrs. Sushma Topno	Paddy cultivation (SRI)	8 Decimal	Sale and self consumption
Mrs. Regina Surin	Paddy cultivation(SRI)	5 Decimal	Sale and self consumption
Mrs. Emrencia Toppo	Paddy cultivation (SRI)	15 Decimal	Sale and self consumption

Maize cultivation

Name of farmer	Agriculture activity	Land Decimal / Acre	Purpose
Mrs. Regina Surin	Maize	15 Decimal	Sale and self consumption
Mr. Lackan Tuti	Maize	10 Decimal	Sale and self consumption
Mr. Sikandar Kr. Mahto	Maize	26 Decimal	Sale and self consumption
Mr. Dinesh Kr. Ganjhu	Maize	23 Decimal	Sale and self consumption
Mr. Arjun Munda	Maize	5 Decimal	Sale and self consumption

Story of change

1. Mr. Gyani Ganjhu, 24 years of age comes from a remote village & Panchayat Base, block Katkamdag and district Hazaribag. His family economic condition was not conducive in the time of using traditional method of agriculture. Those days he and his family members cultivated one or two crops in one season throughout the year. In the month of November 2014 he attended 5 days training on

scientific methods of agriculture at Holy Cross Krishi Vigyan Kendra, Hazaribag and gained sufficient knowledge about different new techniques for cultivation. He began to practice soil test, seed treatment, preparation of nursery bed, planting in the proportionate distance, root treatment and the right use of both organic and inorganic fertilizers.

He cultivates many crops with the method of mix cropping along with the method of integrated farming in order to get more products and increase his farm income. He along with his friend Mr. Dinesh Mahto, took 4 acres of land in lease for tomato cultivation in Charhi but unluckily they were at great loss from this activity because of the issue of water.

In spite of losses from tomato cultivation he continued his agricultural activities in his own field and earned Rs. 100000/- per year and managed to pay off the debts. He is known as progressive farmer in the village. He has planted 24 mangos, 6 guavas, 4 jackfruits, 1 lichi, 1 pomegranate, and 1 lemon plant to ensure more monetary benefit and better climate. Now he has a plan to buy a new motorbike from his agro-product savings for marketing vegetables.

2. The story is of Hardia tola in Badgaon revenue village of Chatra district. Before six months, the farmers of Badgaon were un-aware about the schemes and programs, which are available with government department and its allied agencies. Before April'2018, there was not even a single farmers club in the areas and this could be possible by regular meeting and capacity building by staffs from Jan Vikas Kendra of Hazaribag. Presently, there are two vibrant farmers club named "Sarojama Kisan Club, total 16 members & Bhagwan Birsan Munda Kisan Club, total 15 members" in Hardia tola of Badgaon village. Both the farmers clubs are very active in agriculture activities. The member farmers

club approached ATMA of Chatra to know about the existing services for modern agriculture practices, later they could interact with member officer of ATMA. An orientation program was conducted by member ATMA on 13.09.2018 to share in detail about the available services and infrastructural support for promotion of agriculture activities with modern technology. A total of 12 progressive farmers were oriented about the program by ATMA. Now these members are playing an active role to motivate other farmers in their village for optimal use of organic farming, use of scientific methods of agriculture practices and application of agriculture equipments (infrastructure) for supplement production. Both the groups are having regular meeting, sharing about the agriculture matter and sharing best practices in the group every month. The each member of club are becoming a role model for other farmers of Badgaon & neighboring villages

Fr. Tomy
Director, Jan Vikas Kendra

Mr. Ajit Kr. Tirkey
Coordinator, JVK

JAMSHEDPUR DIOCESE

Farmers club office bearers training at diocese level

S.N	Date	Place	Subject	Participants			Resource Person
				M	F	Total	
1	3rd – 5th May 2018	Jamshedpur	Integrated scientific method of agriculture			38	
2.	3rd – 5th June 2018	Jamshedpur	Integrated scientific method of agriculture			76	

Krishak Mitra Training conducted at Diocese level

S.N	Date	Place	Subject	Participants			Resource Person
				M	F	Total	
3.	27 th 28 th September, 2018	Chatholic Charities, Patel Bagan	Integrated scientific method of agriculture	42	3	45	Walter Kerketta, Arjeeun Tigga & Rathin Hemrom

Contents:

- **Concept of Farmers club:** - Objective of farmers club, Importance of farmers club, Why farmers club?, Roll & Responsibilities of farmers club, Bylaws of farmers club, Roll & Responsibilities of farmers club, Roll & Responsibilities of Krishak Mitra
- **Vegetable cultivation (Potato, Onion, Tomato, Broccoli, French, Beans, Ginger and other green vegetables):-** Basic principal of scientific methods of cultivation, Soil treatment, Seed treatment, Nursery preparation, Root treatment, Field preparation, Methods of sowing, Control of weeds, Pest management by, organic and inorganic, Use of organic and inorganic fertilizer

Story of Change

1. Mr. Mangal Hansda, from Chandpur village, Pota Block, East Singhbhum District, a former daily wage labor who switched to farming in 2017 and now gets a yearly turnover of Rs. 50,000-Rs. 65,000. He transformed his situation radically by growing vegetables.

In Jan 2017, after a very hard labour of 14-16 hours in nearby Tisco-factory, getting meager salary and feeling unsatisfied, he left his Job and decided to give farming an earnest effort on his small piece of land.

The initial days were challenging because of lack of guidance and support. He came in contact with the organization, learnt different ways of growing crops, and finally was inspired by profit in vegetable cultivation. He invested Rs. 2000 for purchasing seed (Tomato, Chilly and Green Leaf), 4 months of engagement in field started bearing fruits. He earned Rs. 21,000 by selling Tomato and Rs. 8,000 from Chilly. He is continuously selling green leaf and chilly, earning good profit from it. His annual turnover is much more than what he is earning from the factory.

In the previous six months, he sold 7.5 quintals of Tomato for Rs. 15,000, 2 quintals Brinjal for Rs. 4,000, Chilly (70 kgs and earned Rs. 3,500) and Green Leaf (regular 4 months he earned Rs. 5000). He is selling vegetables in local market in Kalikapur (Wednesday), Potka (Monday and Friday) and Shankarda (Sunday). He also sells his vegetables by moving in the village.

He is collecting waste from a poultry farm for making compost. He is utilizing compost for vegetable cultivation. His children are studying in school. He also renovated his house and made a shed for taking rest. He saved Rs. 8,000 for future use, which he had deposited in Bank of India, Potka. He also invested Rs. 10,000 in purchasing Jersey Cow, 3 Goats and 1 sheep. He is enjoying

good times with his wife and two children. He is giving his time in field effectively which earlier gone wasted in travel almost 40 kms to reach factory by bicycle.

Mangal is an active member of Evam Akahar Kissan Club, Chandpur. This kisan samity meet regularly, discuss and plan for systematic cultivation. At present 6 members of this committee seeing the progress of Mangal, started preparing agriculture land for cultivational purpose.

2. Jagriti Kissan Club (15 members) was formed on 15 March 2018 in Budhibil village, Berakenduda Panchayat, Anandpur Block, West Singhbhum District. The members are united and conduct monthly meeting regularly. The club formed with an objective to access agriculture schemes, help in agriculture inputs and establish linkages with ATMA and KVK to access trainings and agriculture inputs. At present, the farmer club received 300 ft delivery pipe (Bimal Jojo) and spray machine (Emanuel Jojo and Suresh Longa, members of FC). They also underwent training conducted through SIGN-Ranchi. The member Eliya Jojo and Salmon Jojo purchased pig for rearing. These farmers are cultivating vegetables and selling in the local market. The Secretary Emanuel Jojo is very active in the group; he keeps on encouraging farmers to avail more knowledge better agricultural practices.

3. When most of the farmers are struggling for irrigation in summer, Sora Gara Kissan Samity (20 members), in Tuiya village has set an extraordinary example by introducing water conservation method in its area. Shyam lal Jamdua, a Supervisor being motivated by earthen check dam constructed in Sirkapi and Ichakuti villages decided to do something for the farmers who were struggling very hard to protect their summer paddy during peak dry weather due to lack of irrigation facility in Tuiya village. He started convincing 10-12 farmers about benefit of earthen check dam who were involved in cultivation. Different opinions

and negative words did not crush his dream rather he became more determined to check the flow of water from Nala. He took the farmers to the earthen nala site for learning. The members of Kissan Samity, decided to construct on their own. The initiative was taken by members namely Somai Jamuda, Gonda Jamuda, Pongle Jamuda, Suru Jamuda and others for planning and construction. All the members of Kissan Samity, put efforts in constructing the earthen check dam. The Kissan Samity is protecting forest area, prepare herbal pest repellent and establish linkages with ATMA (they got 25 packet Cucumber and 40 Packets of Garma Moong. The BTM Mr.

Emmnuul Kujur visited Tuiya village to encourage farmers. The intervention has enabled 28 farmers to cultivate summer paddy in the area where only 10-12 farmers were engaged. Presently, farmers without any difficulty are getting better yield. They have also allowed landless farmers if any are willing to cultivate nearby.

Fr. Alwin C.V.
Director, SJVK, Jamshedpur

Mr. Rothin Hembrom

Contents:

- **Concept of Farmers club:** - Objective of farmers club, Importance of farmers club, Why farmers club?, Roll & Responsibilities of farmers club, Bylaws of farmers club, Roll & Responsibilities of farmers club, Roll & Responsibilities of Krishak Mitra
- **Vegetable cultivation (Potato, Onion, Tomato, Broccoli, French, Beans, Ginger and other green vegetables):-** Basic principal of scientific methods of cultivation, Soil treatment, Seed treatment, Nursery preparation, Root treatment, Field preparation, Methods of sowing, Control of weeds, Pest management by, organic and inorganic, Use of organic and inorganic fertilizer
- **Animal husbandry (Goatery, piggery, poultry, fishery, duck rearing):-** Different breeds, Selection of place, House management, Feed management, Common diseases remedies,
- **Foods crops cultivation (Paddy, maize, wheat, mustard oil, gram):-** SRI methods, Soil treatment, Seed treatment, Field preparation, Sowing methods, Control of weeds, Pest management, by organic and inorganic, Use of organic and inorganic fertilizer, Storage of productions
- **Tree plantation (Mango, lichi, guava, papaya and other timber trees):-** Importance of trees, Pit preparation, Caring of the plants, Proper use of water, Management of related diseases of the plant

Outcome of the training

- 149 farmers enhanced their knowledge on scientific methods of vegetables, horticulture and paddy cultivation
- They increased interest in agriculture activity

Agriculture activities of farmers

Paddy cultivation through SRI method

Name of farmer	Agriculture activity	Land Decimal or Acre	Purpose
Mrs. Neeraj Mundu	Paddy cultivation (SRI)	35 Decimal	Sale and self consumption
Mrs. Bahamani	Paddy cultivation (SRI)	5 Decimal	Sale and self consumption
Mrs. Nelson Perti	Paddy cultivation (SRI)	3 Decimal	Sale and self consumption
Mrs. Karuna Nag	Paddy cultivation (SRI)	2 Decimal	Sale and self consumption

Learning of members of farmers' clubs

- Any club has more power and roles to play in the society
- Any communitarian thoughts and spirit become powerful weapons to fight for the justice
- Clubs break the barrier of caste, religion, creed and culture

Problems faced during agriculture activities

- Problems of uncertain monsoon and drought become big obstacles to carry out agriculture work
- Because of water scarcity and hike in Kerosene oil and diesel
- Lack of cold storage facility at block and Panchayat level to store agricultural products and ensure market price of the same
- Lack of man power
- Late supply of seeds by government department
- Lack solid seed available in the market to ensure germination and flowering
- Slow implementation of new method in agriculture activities

Impacts

- Farmers' clubs have played important roles in decision making of village issues
- Ensured and raised helping and supporting attitude towards one another in the group as well as outside the group
- Created a sense of market value among the farmers on the agricultural products
- Tendency towards integrated farming system by trained farmers
- More focus on group approach rather than individual
- Use of new techniques and methods in the farming with minimum available agricultural land.
- In spite of water scarcity every farmer does small agriculture activities surrounding well and ensures proper health of his / her family members.
- Minimizing of seasonal migration
- Economic growth of the family
- Increase of production in quantities and qualities
- Ensure treatment of seed, soil and root as per the requirements
- Minimization of seasonal migration
- Economic growth of the family
- Increase of production in quantities and qualities
- Maximum use of local resources for their livelihood
- Increase of interest in farming
- Sale of the products in the local market
- Constant motivation and moral support of partner diocese as well SIGN, Ranchi to the farmers for the sustainable development
- Initiation of joint venture in agriculture activities
- Pest Management either by organic or chemical method
- Creation of 'Feel Good' in the farmers' club

Story of Change

1. Mr. Sumit Bhengra, age 24 belongs to village Churgi, panchayet Diyenkel, district Khunti of the Jharkhand state. He completed intermediate in I.Sc. then after that he was searching for some jobs. At the same time, he came in touch with Haffmann Social Service Society, Khunti and his father Mr. Philip Bhengra participated in 5 days agricultural training program in Holy Cross, KVK, Hazaribag, organized by the SIGN, Ranchi. He learnt the new techniques and scientific methods of agricultural activities after training and changed his methods of agriculture and cultivated paddy crops adopting the SRI cultivation

methods in 2 acres of land and got good returns from it. Then he also cultivated vegetables crops by SRI cultivation methods and got good returns too.

Hence, Mr. Sumit Bhengra inspired by his father got encouraged and decided to work as a farmer and today it has become his profession and he is cultivating seasonal crops and vegetables at the right time as per the market demand. Then from 2016 he participated in different agricultural training programs organized by Haffmann Social Service Society, Khunti and SIGN, Ranchi as well as he was also suggested by the SIGN staffs during their field visit to be given special attention and guidance. In the last season, he invested as capital of Rs. 2 lacs for watermelon cultivation in 12 acres land and after production he sold it in the market and earned Rs. 5 lacs and thus his actual gross profit was 3 lacs. Now he is more encouraged, motivated that he following year too he cultivated watermelon as well as tomato and pea. He is also focusing in integrated farming system, so he is cultivating different crops as well as focusing in animal husbandry, fishery and fruit tree plantation and by doing this he is giving his introduction to other as a progressive and good hardworking farmer in his village. Now his life style has changed and his family financial situation is becoming very strong. He always would like to give thanks to Haffmann Social Service Society and SIGN, because of them he got such great achievements and also learnt the new techniques and scientific methods of agriculture. Today he has become an example for the others as a young farmer by whom other youth as well as farmers can also get inspired in agricultural sector.

2. Jidan Horo Kisan Club

In the village Manhatu, Panchayet Deiynkel, Block Torpa of District Khunti, there is a farmer's club named *Jidan horo kisan club*. It was established on 20th October, 2017. In this club there are total 20 members. Majority of the people belongs to *Munda* tribe in this village and most of their *Gotar*

(title) are *Bhengra*. On 20th day of every month, all the members of the club come for meeting. In the meeting, each member contrites Rs. 20.00 for saving. They maintain propoer accounts of the savings. They also discuss different social, agricultural etc related issues of the village. They cooperate with each other for timely cultivation of crops.

Social and Economical changes in the village after formation of the club

- Proper caring of animal for grazing
- Coming together to produce vegetable in village as a bulk
- Day and night watchmen and monitoring committee is working 24 hours in village
- Proper use of the health and education facilities in village
- Proper utilization and implementation of the block level government schemes
- Proper utilization of the land
- Coming forward for market activities.
- Coming changes in daily living life styles in village.

3. Kamal kisan club

Village Latawali, panchayet Hussir, block Torpa, district Khunti of Jharkhand state is situated 85 km far from Ranchi the capital of Jharkhand. In this village majority of the people belongs to Munda tribe. This village comprises of 12 small villages inhabited by *Munda tribe and Bhogta and Rayat*. There is a farmer's club named Kamal Kisan club. There are total 17 members in this club. Earlier this club was known as Mdayati, Saiyana and Pancha. But later on after coming in touch with Hoffmann Social Service Society, Khunti, they also participated in the different training programs and became more aware about different activities. They also started to discuss the different types of issues in the village like social, political and cultural while emphasizing lot on education of the children. All the club members also shared their thoughts in *Gram Sabha*, by which others also understood the importance of Farmers' Club. On 18th December, 2017, the *Kamal kisan club* reformulated itself and the followings are the proposed activates which are mostly followed by SIGN partners .

- Vaccination for the animals from the Department of the animal husbandry
- Arrangement of clean drinking water
- Arrangement of the water like canal check dam, hand pump, well for irrigation, drinking as well as for bathing in village.
- Helping each other in agricultural activities
- Seed arrangement for different crops and vegetables.
- Making fertilizer available for wasteland and cultivating grains and vegetables.
- Making strong the old social traditional of *padha raja* for the good governance.
- Market control in village level for right price of the crops and vegetables.
- Aware about the new techniques of the agricultural activities.

Mr. Juel Bhengra
Coordinator, HSSS, Khunti

Stories of change

1. Mr. Theophil Tigga, father late Agpit Tigga belongs to village Brambey, panchayet Brambey, block Mandar, district Ranchi. While in joint family they were running a hotel for income generation. Once, the family got separated he took to agriculture. He cultivated paddy as well as little bit of pea in his agricultural land. Some time he used to cultivate some vegetables like capsicum, brinjal, ginjir etc. Earlier he had very less interest in agricultural activities. In 2015 he got opportunity by Catholic Charities, Ranchi to participate in farmers training. After the training, he started agricultural work with a newly earned knowledge including the use of fertilizers. He went more for roganic manure. Recently he has cultivated cabbage, capsicum, cucumber, beans and green chill in his land as major vegetables crops.

Earlier he used to cultivate crops in 50-60 dismal of his land but after getting the training now he cultivates crops in 2 acres of land. In 2016 he got drip irrigation facilities from the government department and he started to irrigate the crops by drip irrigation facilities. Inspired by him 6 other farmers of the village also started to irrigate the crops by drip irrigation facilities. Now the financial situation of his family has become very strong in comparison to earlier days. He has adopted now agriculture as his major occupation. He is able to manage the family very well and pay for the education of the children too. Inspired by him today 22 farmers are also cultivating crops in their land by adopting the new techniques and scientific cultivation methods and at the same time all the framers realized that it is very hard to cultivate the crops by simple diesel pump machine only. They came in a group and decided to bring electricity facilities to their village and today all are irrigating their land by using electric motor machines. They contribute to repair on any damage. In this way all the communities Hindus, Muslims, Sarnas, Christians of the village respect him a lot. If any problem or issue comes in their village they approach him and he is able to solve the problems as well as support them.

2. Village Bishakhatanga, post office Bishakhantanga, panchayet Bishakhantanga, district Ranchi has 465 households. Earlier they were cultivating very less crops and were scattered. Two-three people thought that nothing is possible if alone and thus 16 families come together and formed a club of 16 members on 18th April, 2018 naming it Vikas kisan club. After making the club, they started weekly meetings and discussed various issues. The group is engaged in agricultural activities in a scientific way which is bringing them better yield. They also work few hours in a week to earn money for the club for the creation of a capital. Indeed, the capital is given to the very

needy group members. Today they are also taking benefit government schemes like well, fertilizer, seeds, pump set etc.

3. Name of Kisan Club - Heeranagpur Kisan Club
Village – Murumgara
Panchayat & Post – Gurugai
Block – Burmu, Dist Ranchi

The farmers of this village were engaged in their usual activities of cultivation without much earning. The intervention of Catholic Charities in this village opened their eyes to come together into a club for thinking together and learning from one another. People unanimously agreed to form a club and bring about some change in their life. Thus, Heeranagpur Kisan Club was formed on 8th April 2018 with the membership of 15 farmers.

They all are the farmers practicing integrated farming but they were facing various challenges and there was not much gain. After joining hand as farmers club they took up the following steps to enhance their agriculture practice:

- Electricity brought to village
- Electric transfer installed
- Applied for the government support for
 - o 4 farmers for irrigation well – received in 2017 (before the formation but after training)
 - o 5 farmers applied for drip irrigation in 2018
 - o 3 farmers applied for pesticide spray machine in 2018
- The group has motivated 11 more farmers from village to adopt scientific cultivation.
- Earlier they were selling their vegetable product in local market of Burmu village. Now they are supplying vegetable to Jamshedpur vegetable market.
- Their role in community: Heeranagpur Kisan Club is the group of self motivated farmers, they played vital role in community Building.
 - o Repairing road giving volunteer service by the community
 - o Their suggestion in dispute settlement is accepted by community and the Gram Sabha Members

Mr. Kamal Kujur
Coordinator, Ranchi

Fr. Anil Kujur
Director, Ranchi

SIMDEGA DIOCESE

Farmers club office bearers training at diocese level

S.N	Date	Place	Subject	Participants			Resource Person
				M	F	Total	
1.	23rd – 24th April 2018	Vikas Kendra, Simdega	Integrated scientific method of agriculture	35	3	38	Walter Kerketta, Satyendra Tudu & Cyprian Kerketta

S.N	Date	Place	Subject	Participants			Resource Person
				M	F	Total	
2.	18 th -20 th June, 2018	Vikas Kendra, Simdega	Integrated scientific method of agriculture	27	2	29	Satyendra Tudu & Cyprian Kerketta

Krishak Mitra Training conducted at Diocese level

S.N	Date	Place	Subject	Participants			Resource Person
				M	F	Total	
3.	10th -11th September, 2018	Vikas Kendra, Simdega	Integrated scientific method of agriculture	41	5	46	Walter Kerketta, ArjeeunTiga & Cyprian Kerketta

Contents:

- **Concept of Farmers club:** - Objective of farmers club, Importance of farmers club, Why farmers club?, Roll & Responsibilities of farmers club, Bylaws of farmers club, Roll & Responsibilities of farmers club, Roll & Responsibilities of Krishak Mitra
- **Vegetable cultivation (Potato, Onion, Tomato, Broccoli, French, Beans, Ginger and other green vegetables):-** Basic principal of scientific methods of cultivation, Soil treatment, Seed treatment, Nursery preparation, Root treatment, Field preparation, Methods of sowing, Control of weeds, Pest management by, organic and inorganic, Use of organic and inorganic fertilizer
- **Animal husbandry (Goatery, piggery, poultry, fishery, duck rearing):-** Different breeds, Selection of place, House management, Feed management, Common diseases remedies,
- **Foods crops cultivation (Paddy, maize, wheat, mustard oil, gram):-** SRI methods, Soil treatment, Seed treatment, Field preparation, Sowing methods, Control of weeds, Pest management, by organic and inorganic, Use of organic and inorganic fertilizer, Storage of productions
- **Tree plantation (Mango, lichi, guava, papaya and other timber trees):-** Importance of trees, Pit preparation, Caring of the plants, Proper use of water, Management of related diseases of the plant

Outcome:

- 113 participants learned how to use the fertilizer in the crop
- They learned pest management and storage of tomato and potato
- They differentiated between advantage and disadvantage of intercropping

Agriculture activities of farmers

Paddy cultivation through SRI method

Name of farmer	Agriculture activity	Land Decimal or Acre	Purpose
Mr. Jidan Jojo	Paddy cultivation (SRI)	3 Decimal	Sale and self consumption

Story of Change

1. Mrs. Joyti Kerketta age 55 comes from village Belgarh, Panchayat Jogbhar of Simdega district, Jharkhand. It is 8 km away from Simdega town. She came in contact with Mr. Cyprian kerketta, the staff of Vikas Kendra and attended 5 days of residential training program held in the year 2016 in Holy Cross Krishi Vigyan Kendra, Hazaribag. Five days of training program helped him to know the scientific methods and gained technical knowledge to identify the activities, which give

better produce. She got ideas for earning good income from agricultural activities. She identified the land, which is next to her house. In this land, she used integrated agriculture activities such as piggery, poultry, horticulture, flourmill and varieties of vegetables. The woman farmer has become an inspiration in the village.

2. St. Joseph Kisan club is in village Garja, Khapratoli, panchayet Garja, district simdega of Jharkhand state. In this club there are 20 members including one widow. The club was established on 18th January, 2018. There are three post holders namely Mr. James Kiro, Mr. Silas Kiro and Mr. Xavier Tete as a president, treasurer and secretary respectively. Three of the post holders participated in three days training program organized by the SIGN, Ranchi on 23rd-25th, April, 2018 at Vikas Kendra, Simdega. During the training, they understood about the objectives, responsibilities and rule & regulation of the farmers club and soon

after the training they went to the village and started monthly meeting, the 28th of every month. In the meeting, the members realized the importance of natural resources and they established a forest protection committee. One by one, the forest was protected and cutting of trees was stopped by the members of the

club. They also came together in giving a helping hand in harvesting paddy crops and other related activities. They have also realized the bad impact of chemical fertilizer, so they are using cow dung as a fertilizer in a maximum ratio. The club members also have taken a decision to limit the use of alcohol as it is destroying many families.

3. Village Gambhariya Jhariya, panchayet Konmenjra, block Thithitangar, district Simdega of the Jharkhand state has a majority population of Gond and Khadiya tribes. There is a farmer's club named Pragati kisan club formed on 7th June, 2018. In this club there are total 12 members including president, secretary and treasurer namely Mr. Sahinder Pradhan, Rajkumar Majhi and Sahdeo Gond. Three of these post holders participated in the 3 three days training program on 18-20th June, 2018 at Vikas Kendra, Simdega, organized by the SIGN, Ranchi. Soon after the training, they started weekly meetings and saving of money. In the meeting they discussed about the importance of forest and natural resources, therefore, they established a forest protection committee. Now they all are giving their full support to protect the forest. They also are focusing on the integrated farming system, started to make organic fertilizer and have begun animal husbandry like goatery etc. After the training, Sahinder Pradhan has cultivated paddy crops by SRI methods. Five farmers have cultivated paddy after the treatment of the seeds.. They are also caring the children of the village and they are sending all the children to school. Earlier most of the children were not going to school but now all the children are going to school.

Fr. Sebastian Ekka
Director, Vikas Kendra, Simdega

Mr. Cyprian Kerketta
Coordinator, Vikas Kendra, Simdega

Over all impacts of last year

- ✓ 881 farmers' clubs have been formed and consist of 12300 members in the group till now
- ✓ 1056 office bearers of farmer's clubs got training on new techniques, method of agricultural products and bylaws of F C
- ✓ 411 Krishak Mitras got training on new techniques, method of agricultural products and their roles and responsibilities
- ✓ Networking with 11 district project directors to share the strategic planning of the project and get help from Krishak Mitras to form FC in the project area
- ✓ 1762 parents of the sponsored children got trained on the new techniques and methods of agriculture
- ✓ 138 famers have cultivated paddy cultivation through SRI methods in 26.79 acres
- ✓ 337 farmers have cultivated vegetables in 103.3 acres
- ✓ 152 farmers have cultivated maize in 25.73 acres
- ✓ 129 farmers have cultivated wheat in 26.5 acres

- ✓ 121 farmers have ensured kitchen garden for better nutrition practices
- ✓ 234 farmers have done cash crop in 79.87 acres to strengthen the family economic condition
- ✓ 138 farmers have done animal husbandry to ensure integrated farming
- ✓ 56 farmers have done fishery
- ✓ 100 farmers done horticulture activities
- ✓ 203 farmers have cultivated pulses
- ✓ 121 trained farmer have shared their knowledge on agriculture to 2479 farmer of the villages

Conclusion

The first phase of the project concentrated very much on trainings and capacitating the farmers across Jharkhand. Trained farmers faced many challenges in implementing the techniques, methods due to water issues as well as to access basic agricultural requirements from the government and other agencies.

The second phase concentrated on knitting the farmers together into Farmers' clubs in order to give them a platform to share and to learn from one another. The club also gives them the possibility of working together and expressing their needs together. Their voice is now heard. In the project period 881 farmers' clubs have been formed and have 12300 members in the groups till now. SIGN, Ranchi organized training program for the office bearers of farmers clubs in all the partner dioceses in which 1056 participated and benefitted in many ways. Trainings were also organized for Krishak Mitras where 411 participants attended and enhanced themselves with new techniques, scientific methods and some clarification on their roles and responsibilities as well.
